Lynda,

The meeting invite for the April 7 conference call on the 2017 Field Activities was sent to yourself, Greg Reller, Tony Brown, Jill Jefferson and Grant Ohland. Britt Jones may join us as well; however, at this point these are the anticipated participants for Atlantic Richfield. Legal counsel is not participating.

The cc list on Atlantic Richfield's outgoing correspondence is partially determined by their own internal protocols, and therefore we may cc legal counsel, upper management, other technical personnel, and/or other Atlantic Richfield consultants on our outgoing correspondence for a wide variety of reasons. We assume that you as the U.S. EPA RPM will disseminate the correspondence internally within EPA as you see fit. If we believe that counsel should be in attendance we will include EPA counsel on the invite distribution list.

If there is a question as to the invite distribution list for a meeting scheduled through Outlook, the scheduling assistant will provide the distribution list. Simply double-click on the item in your calendar, select the Scheduling Assistant tab, and the invited participants will be displayed as shown below.

Scheduling Assistant Tab

Attendance List

We are currently preparing materials for discussion purposes and will provide them to

EPA in advance of the conference call.

Thanks,

Marc

Subject: RE: Leviathan Mine - 2017 Field Activities - Schedule Discussion

Please clarify who will attend this meeting? In one email ARC's Legal Counsel was copied. Please clarify.

Thanks for the webinar link.

Also as requested 3/6/17 within 14 days; and then 3/30/17 by April 5th in advance of the

technical call on April 7th Please provide your 2017 field activities schedule at least 48 hours in advance of this meeting so that EPA can review and prepare for questions. A presentation Only is never as productive as two way conversation/discussion.

●□□□□□□ Please ensure that schedule indicates work requiring tribal monitors and also includes (per EPA 12/22/16 comment s **S7: Remaining/Additional Sampling Plans:** EPA Guidance for Conducting Remedial Investigations and Feasibility Studies Under CERCLA (EPA/540/G-89/004) in Chapter 2, Scoping of the RI/FS at Section 2.2.6 Identify Data Needs clearly indicates that ARC, in advance of characterization, shall identify the expected data needs. In recent months, EPA has received additional sampling plans (i.e. biomass availability submitted in an email 09/09/16; In Vitro Bioaccessibility Testing submitted 11/29/16 and we've been notified that ARC will soon provide a SAP for further investigation of the floodplains in the beaver dam area). Please ensure that all data needs have been completely identified. Please provide an updated and revised schedule that clearly lists and articulates any remaining or anticipated field work for completion of a draft RI/FS by December 31, 2017 and **"S8: Outstanding work previously requested"**.: EPA has provided significant comment and discussion in separate EPA comments on separate workplans. In at least a few instances, EPA approved for field work to proceed, but noted that additional work was necessary for completion of the RI/FS. For example, but not limited to, EPA requested additional investigation on the following workplans: geotechnical (See EPA comments dated July 8, 2016), Hydrocarbon investigation (see EPA comments dated April 20, 2016, and revegetation (see EPA comments dated July 7, 2016). Please ensure that all EPA requested investigations are included in a revised and updated schedule to show that this, and other requested remaining field work will be completed in time for preparation of a draft RI/FS

Best Regards,

Lynda Deschambault
